V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. STATEMENT**

Novelty (N)	Claims <u>1-83</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-83</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-83</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-83 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a system in which communications hardware and features of a computer telephony-based system are off-loaded to a separate hardware node. Additionally, an integrated computer/telephony communications system is provided which does not utilize existing telephony-based communication management systems infrastructure. The distributed computer telephony systems utilize Internet or conventional network-based platforms that allow users direct access to existing telecommunication infrastructures without any investment in premise-based hardware or any specialized software, therefore the systems allow users to access and/or configure their personal assistant from any standard Web browser without purchasing or installing any software on their computer, private network, or existing phone system.
